## Professional authorisation

This master is an official title that prepares you for the practice of the professions of teacher of secondary obligatory school, baccalaureate, professional training and languages teaching.

## Objectives

The main objective is that the students know the contents of the subjects related to its teaching specialisation, as well as the corresponding teaching processes and learning.

## Access requirements

Having a Spanish university official degree or other dispatched by a high educational institution of the EEES that authorises at the origin country for the access to the master education. Moreover, graduates from educational systems external to the EEES can also access, prior verification by the University that they recognise a level of training equivalent to the corresponding official Spanish titles and that authorises at the sender country of the title for the access to postgraduate studies.

## Ingress profile

University graduates on topics related to the specialisation that they wish to study. In case of the degree of the student does not coincide with the speciality that he or she wants to study, an access exam or test must be passed.

## Admission

It is necessary to prove the command of a foreign language, equivalent to the level B1 of the Common European Framework of Reference for Languages.

## Modality of teaching and study system

Face-to-face, full time.
